Mountain Wilderness (MW) International is hosting an online event to mark **International Mountain Day** and the closing of the **International Year of Glacier Preservation**.

The program will feature **guest speakers** working on glacier-related projects, from scientific research to artistic exploration.

Representatives from several **MW national chapters** will share updates on glacier conditions in their countries and present MW initiatives focused on their protection.

Together, we'll reflect on the urgent need for **stronger synergies** to safeguard our glaciers and conclude with a **call to action** and an **open discussion** with the public.
